Work Experience:

IT Department, NAR Power Specialists Corporation March - June 2023

On-the-Job Training

- Developed a web based project for the company
- Design a process of reports for the employees
- Web Designer
- Applied the PHP, JavaScript, HTML and SQL Database in developing the website
- Data encoding
- Front End Developer
- Completed the 600 hours

Software Development Experience : Capstone Project

Developed an online reviewer system that provides a comprehensive list of board exam questions that were written by the professors and admins of the College of Criminal Justice and Education for its students.

- Used RAD (Rapid Application Development) as a software development methodology, allowing an early testing of the prototypes by the client and an iterative software development.
- Gathered information through interviews and workshops with the client to identify the customer requirements and solutions.
- Created use-cases and flowcharts of the system.
- Used Adobe XD for system's UI design.
- Involved in converting layouts into websites using html, css, javascript, bootstrap with neat and clean coding.
- Worked on HTML, CSS, javascript and their integration within a PHP environment.
- Used PHP / MySQL in XAMPP environment for creating dynamic data-driven and interactive web pages.
- Worked with bootstrap to develop a responsive application.
- Performed unit testing and debugging to ensure that all code meets quality standards before it's deployed.
- Performed manual functional testing to ensure that each feature works as expected before the prototype release.
